Contract information pack for electricity

Contract quotation for Orbit Group

Limited

We are pleased to provide you with a quote for your electricity supply.

At EDF we aim to provide a great value service and keep our prices competitive. With this in mind, please find enclosed your contract information pack which includes:

- This covering information sheet
- Price Schedule
- Quote Summary
- Notes and Glossary
- Agreement (Term Sheet & Terms and Conditions)
- (Where applicable) Third Party Intermediary Commission Schedule.

As you may be aware the wholesale cost of electricity is the main component of your prices and the UK electricity market is highly volatile. This means our quotes are subject to change and can be withdrawn without notice prior to the contract becoming legally binding. Unless otherwise indicated, terms used in this contract information pack bear the same meaning as are attributed to them in the Terms and Conditions, provided that if there is any conflict the provisions of the Terms and Conditions shall prevail.

If you would like to discuss any element of this documentation or have any queries, please feel free to contact us.

We hope to hear from you soon.

Yours sincerely

[REDACTED]
Account Manager, Mid Market

Key quote information

The quote within this pack is for a contract which has been quoted at Fully Inclusive Price Point. Please review the 'Quote Summary' within this pack for a summarised guide to the costs that are included and excluded in this quote.

The following information makes up this quote:

- Quote Date: 11/12/2025
- Earliest Supply Start Date: 01/04/2026
- Earliest Termination Date: 31/03/2027
- Term: 12 Months
- Terms and Conditions: Peace of Mind - Electricity T&Cs - v15.6 effective 31 03 2025
- Number of Sites: 25
- Number of MPANs: 25
- Volume Tolerance Threshold / Period: N/A
- Payment Terms: Shown on Price Schedule
- Value Added Product(s): Yes

Next steps

Please review the information contained within this contract information pack to make sure that it is correct. Please contact us if any amendments are required.

1. Check the company details have been captured correctly within all pages of this contract information pack
2. Check with EDF to see if this quote is still valid
3. Check that the details on the Price Schedule are as expected and that the consumption allocated to each supply is in line with your forecast for the duration of this contract
4. Make sure that the correct contract information pack is signed where more than one quote has been supplied. The Contract Quote Reference is located in the top left hand corner of each page

If you would like to enter into the Agreement with us on the basis of this quote, please sign and date the Term Sheet and return the signed Term Sheet to EDF by email. Please also ensure that the signed hard copy is posted to us at the address at the top of this sheet.

Please remember

- By signing and returning the Term Sheet you have confirmed that you have read and agreed to the Terms and Conditions
- The contract will only become legally binding once EDF has confirmed acceptance in writing of your returned signed Term Sheet
- To provide the necessary termination notice to your current electricity supplier if appropriate

Please note acceptance cannot be provided by telephone.

Third Party Intermediary Commission Schedule

The Third Party Intermediary Costs (TPI Costs) displayed here represent any fees, commission or other consideration including a benefit of any kind, that may be processed, paid or to be paid by us, to the Third Party Intermediary (TPI), in respect of your contract and are directly passed on to you. The commission rate is set by the TPI, however the units are based on forecasted consumption (as per your Price Schedule), as such the TPI Cost is a forecasted cost.

Electricity Agreement Term Sheet

Parties to this Agreement

This Agreement (the 'Agreement') is between:
EDF Energy Customers Limited (company number 2228297) a company incorporated in England and Wales with its registered office at Nova North, 11 Bressenden Place, London, SW1E 5BY ('we' and 'us');

and **Orbit Group Limited** ('you') registered number IP28503R with its registered office at C/O EIC Partnership, Monarch House, 7-9 Stafford Road, SM6 9AN.

Scope of this Agreement

It is agreed that we will supply you with electricity and you will take this electricity at the Supply Point(s) (and their Meter Identifiers) referenced in Q_2135133/20 and in accordance with the Terms and Conditions.

If any Supply Point details within the Price Schedule change during the Term of the Agreement, we reserve the right to apply Charges in accordance with the Terms and Conditions.

Term

Earliest Supply Start Date: **01/04/2026**

We will supply electricity to the Supply Point(s) listed within the Price Schedule from the Earliest Supply Start Date for the Term as outlined above. If any Supply Point is being supplied by another electricity supplier, your Earliest Supply Start Date will be as soon as reasonably practicable and, in any event, within five (5) Working Days of the date when we have accepted your signed Term Sheet and you have provided us with sufficient information to complete Registration of the Supply unless the Earliest Supply Start Date is a later date or one of the conditions within the Supply provision of your Terms and Conditions apply.

Principal Terms

The following Principal Terms are the key provisions of your Agreement with EDF Energy. Your Agreement comprises the Terms and Conditions (T&Cs) and this Contract Information Pack, incorporating the Term Sheet, as provided to you by us. By signing and returning the Term Sheet you are confirming that you have read and have agreed to the terms of the Agreement, so please take some time to read this important information.

Charges

The Price Schedule contained within the Contract Information Pack sets out our agreed charges as at the date of the Agreement. The 'Charges, Invoices and Payment' and 'Variation' provisions of our T&Cs set out how we charge you, how we can change what we charge you, as well as other charges that may become due. This includes any charges as a result of changes to your Total Forecasted Consumption.

Alternative charges will apply to a Supply Point from the Earliest Termination Date, please see the 'Extension' provision of the T&Cs.

Duration

Your contract is legally binding from the date EDF Energy confirms acceptance in writing of the signed Term Sheet.

The Earliest Supply Start Date and Earliest Termination Date of your contract are shown on page 1 of this pack, as well as in the header of each page.

Certain provisions of the contract may continue after the Earliest Termination Date. The 'Ending the Agreement' provision of the T&Cs explains this.

Termination

The 'Ending the Agreement' provision of our T&Cs sets out how the Agreement may be terminated. We may charge you an Early Termination Charge if the Agreement is terminated early, or a Supply Point Removal Charge each time a Supply Point is removed from the Agreement in accordance with Schedule A of the T&Cs.

Micro Business

If you are a Micro Business customer you do not need to notify us if you wish to end this contract after the Earliest Termination Date and you can switch to another supplier, unless a supplier licence condition applies. We will continue to supply you on the terms of this contract until the switch to your new supplier is made, save that Extended Supply Charges will apply.

If you are a Micro Business customer that has come to us through a Third Party Intermediary, they will provide you with a Third Party Intermediary Commission Schedule which will inform you of any costs that we have paid, or may have to pay to them over the course of this Agreement and directly passed on to you, unless no costs have been passed on.

Credit Support and Advance Payments

We have the right to ask you for credit support which may include the payment of a security deposit. Please refer to the 'Credit Support and Advance Payments' provisions of the T&Cs for further details. We will communicate any request for a security deposit to you in writing (including email).

Liability

The 'Liability' section sets out the restrictions on either party's liability under the Agreement.

Additional Agreement Provisions

Acceptance clause: This Agreement is conditional upon all the Connection Conditions being satisfied in relation to the Supply Points identified in Price Schedule quote ref. Q_2135133/20.

If there are any Supply Points within the Price Schedule that you do not wish us to supply, or if any information provided at the time of quotation is found to be incorrect, we reserve the right to terminate this Agreement and/or withdraw the quotation.

Electricity Agreement Term Sheet

Please remember

- Before signing please ensure that all the information in this contract information pack is correct
- Please make sure you have read through and accepted the terms as laid out in the Term Sheet as well as the full Terms and Conditions enclosed with the contract information pack
- If your payment is by Direct Debit you will also need to return your completed Direct Debit instruction alongside your signed Term Sheet
- If you use a third party intermediary to negotiate our Charges, their fees may be built into the Charges we charge you under this Agreement. It is your responsibility to make enquiries with such third party intermediary to ensure that you fully understand the nature of such third party intermediary's fee
- If you are a customer that has come to us through a Third Party Intermediary, they will provide you with a Third Party Intermediary Commission Schedule which will inform you of any costs that we have paid, or may have to pay to them over the course of this Agreement and directly passed on to you, unless no costs have been passed on.

Sign here

If **Orbit Group Limited** would like to enter into the Agreement with us on the basis of this quote, please sign and date the Term Sheet and return the signed Term Sheet to EDF Energy by email.

Please also ensure that the signed hard copy is posted to us at the address at the top of this sheet.

If a third party intermediary is acting on behalf of the Customer and intends to sign the contract, please note that a valid Power of Attorney in a form and substance acceptable to EDF Energy will also need to be submitted alongside the signed Term Sheet.

If you are a customer that has come to us through a Third Party Intermediary, they will provide you with a Third Party Intermediary Commission Schedule which will inform you of any costs that we have paid, or may have to pay to them over the course of this Agreement and directly passed on to you, unless no costs have passed on. Please check with your Third Party Intermediary if you should receive a Third Party Intermediary Commission Schedule. If you should, please read and understand it before signing and returning the Term Sheet.

By signing and returning the Term Sheet you have confirmed that you have read and agreed to the Terms and Conditions.

This Agreement will only become legally binding once EDF Energy has confirmed acceptance in writing of your returned signed Term Sheet.

The 'Customer': Orbit Group Limited
 Please use **BLACK INK** and **CAPITAL LETTERS**.

HH metering charges

Half hourly meters are normally read electronically by the appointed Data Collector through a telecommunications link.

It is advisable for you to negotiate direct contracts with your own preferred Meter Operator, and your own preferred half hourly Data Collector / Data Aggregator, to take advantage of the competitive market.

Where you do not, we will nominate one on your behalf, in accordance with industry guidelines. In the instance that you do not contract with and pay your metering agents directly, we will include any Metering Agent Charges on your monthly invoice.

An indicative schedule of charges is detailed here. This includes standard half hourly Data Collector / Data Aggregator fees, but excludes other charges (such as Meter Operator charges, Meter Asset Provider charges and charges for manual meter readings). Please note that these charges are indicative and may be subject to change.

Code of Practice

The Code of Practice relates to the meter and associated metering functionality. Please refer to the Notes for more information.

Code of Practice	Indicative charge per MPAN per month
5 - with communication link (remotely read)	£20.75 / month
Total	£20.75 / month

3 - with communication link (remotely read)	£41.50 / month
Total	£41.50 / month

Price Point and Cost Component Treatment

Price Point Description

Your Price Point determines whether the below cost components are charged on a Fixed Basis or a Pass Through Basis.

		Price Point					
		Fully Inclusive	Fully Inclusive Minus DUoS	Fully Inclusive Minus TNUoS	Fully Inclusive Minus DUoS & TNUoS	GSP	NBP
Cost Component	Energy	Fixed	Fixed	Fixed	Fixed	Fixed	Fixed
	Tloss	Fixed	Fixed	Fixed	Fixed	Fixed	Pass Through
	TNUoS	Fixed	Fixed	Pass Through	Pass Through	Pass Through	Pass Through
	Dloss	Fixed	Fixed	Fixed	Fixed	Pass Through	Pass Through
	DUoS	Fixed	Pass Through	Fixed	Pass Through	Pass Through	Pass Through

Fixed = Charged on a Fixed Basis

Pass Through = Charged on a Pass Through Basis

Additional Cost Components

Electricity suppliers are the public face of the electricity industry. Part of our role therefore entails invoicing charges on behalf of other service providers in the supply chain, such as metering agents. These charges and how you pay for them are set out below:

Charged on a Fixed Basis and included in your unit rate

Hydro
Elxon
Low Carbon Charges (where applicable, dependent on your Electricity Source)

Charged on a Fixed Basis in addition to your unit rate (where applicable)

Standing Charge
Tax
Climate Change Levy (CCL)
CCL Exemption (CCLE) Charge

Charged in addition to your unit rate (where applicable)

Metering Agent Charges

Charged on a Fixed Basis and included in your unit rate (unless specified otherwise in your Terms and Conditions)

Renewable Obligation (RO)
Feed in Tariff (FIT)
Contracts for Difference (CfD)
Capacity Market (CM)
Balancing Services Use of System + Residual Cashflow Reallocation Cashflow (BSUoS + RCRC)

N.B. You can choose to pay your RO, FIT, CfD, CM and BSUoS + RCRC charges on either a Fixed or a Pass Through Basis. If Fixed, a forecast rate will be included within your unit rate.

Charged in the same manner as DUoS

Availability Charge
Excess Capacity Charge
Reactive Power Charge

Explanations of price points and cost components may be found in the Notes and Glossary sections. Please see the 'Charges, Invoices and Payment' and 'Variation' provisions of our Terms and Conditions for more details regarding your charges.

Our fuel mix

Every year we must publish details of the fuel sources that have been used to generate the electricity we supply to our customers. The information in the table below covers our supply licence for EDF Energy Customers Ltd for the period from April 2024 to March 2025. Our customers' electricity is sourced from our own UK power stations, the wholesale energy market and other independent power generators. We are a major supporter of independent renewable generators.

	Coal	Gas	Nuclear	Renewable	Other	CO ₂ g/kWh	Radioactive waste g/kWh
EDF Energy's fuel mix	4.2%	21.0%	54.8%	18.2%	1.8%	135	0.0038
Contribution to our carbon emissions	28.3%	59.3%	0.0%	0.0%	12.4%		
UK average fuel mix	5.9%	33.3%	16.2%	42.1%	2.5%	154	0.0011

The figures for UK average fuel mix are provided by the Department for Energy Security & Net Zero (DESNZ). Depending on the tariff you are on, the fuel source and carbon emissions associated with the generation of your electricity may vary. For more information on our fuel mix, visit edfenergy.com/fuelmix.

EDF Energy's fuel mix per tariff or product	Coal	Gas	Nuclear	Renewable	Other	CO ₂ g/kWh	Radioactive waste g/kWh
Zero Carbon ¹	0.0%	0.0%	100.0%	0.0%	0.0%	0	0.0070
Renewable ²	0.0%	0.0%	0.0%	100.0%	0.0%	0	0.0000
All Other ³	7.2%	36.2%	53.0%	0.5%	3.1%	233	0.0037

(1) Zero carbon: Zero carbon tariffs and products include any sold as 'nuclear backed', such as Zero Carbon for Business (formerly Blue for Business).

(2) Renewable: All renewable tariffs and products.

(3) All other: All other tariffs and products - tariffs not referred to as Zero Carbon or Renewable.

The nuclear backed and renewable electricity that we buy for Residential, SME, Zero Carbon for business (formerly Blue for Business) or Renewable tariffs and products is supplied into the National Grid. Customers receive that electricity through the National Grid, not directly from Zero-carbon generators.

Dispute Settlement

Talk to us about our service. We constantly monitor our service but if you do need to complain, it's easy and we'll listen. To make a complaint, or for a copy of our complaints procedure, visit edfenergy.com/large-business/customers/complaints. You can also call us on 0845 366 3664 for this or any other feedback.

Notes

Climate Change Levy (CCL) (Registration No. 523 0412 02 0000)

The levy is part of a range of measures designed to help the UK meet its legally binding commitment to reduce greenhouse gas emissions.

It is chargeable on the industrial and commercial supply of taxable commodities for lighting, heating and power by consumers in the following sectors of business: industry, commerce, agriculture, public administration, and other services.

The levy does not apply to taxable commodities used by domestic consumers, or by charities for non-business use.

Where VAT is charged at the standard rate, CCL (plus VAT on CCL) will usually be added to the invoice.

Where VAT is charged at the reduced rate (for example when an electricity supply is used wholly or partly for domestic or charitable non-business use), or if you are on a renewable or Good Quality Combined Heat and Power (CHP) source contract, this proportion of the supply is automatically excluded from CCL.

If we elect to supply you with a higher proportion of CCL exempt power than the agreed CCL percentage exemption, or you are not on a renewable or Good Quality Combined Heat and Power (CHP) source contract but we elect to supply you with a proportion of power which is from renewable or CHP sources, you will be charged an amount equivalent to the CCL that you would have been charged on that power had it not been CCL exempt.

These rules are applied automatically at the time of invoicing.

Where VAT is charged at the standard rate but sites are entitled to full or partial relief from CCL, you will need to submit a PP11 supplier certificate for each site to advise us what percentage of relief is applicable.

PP11s are only available from HM Revenue & Customs (HMRC) and can be downloaded from their website: www.hmrc.gov.uk
Please note that PP11 supplier certificates are not transferable between electricity suppliers. Find out more on our website: edfenergy.com/largebusiness

Code of Practice

The Code of Practice relates to meter and metering functionality. Meters have to meet set criteria under Codes of Practice.

These Codes lay down the specification of accuracy, parameters of recording information or data, type of data retrieval and how long the meter can stay on circuit.

The larger the supply the more accurate the meters have to become, and as such the electricity Codes of Practice (CoP) fall into bands of demand, as follows:

- CoP 1 >100MW
- CoP 2 >10MW up to 99.9MW
- CoP 3 >1MW up to 9.99MW
- CoP 5 >100kW up to 999.9kW

Your metering system may be changed to a different Code of Practice in the event of for example a change in capacity following an upgrade or downgrade of supply.

We reserve the right to apply Charges relevant to the new Code of Practice metering.

Rate Simplification

If you have chosen to have your price rates simplified, your invoices will still illustrate the complete rate structure for your site or MPAN, with the same price for each rate, e.g. if your site has two rates which cover day and night, both these rates will show the same price.

Triad Charges and Reconciliation Process

Transmission Network Use of System (TNUoS) is the charge the transmission company makes for transmitting power to the end user over its network.

The Transmission Network Use of System (TNUoS) charge for half hourly metered customers is comprised of Triad charges and, where applicable, banded charges.

Where you have chosen to be priced at a price point where TNUoS is charged on a pass through basis, your Triad charges will be reconciled against the actual Triad costs published by National Grid. These costs are usually published in March each year. Any banded charges applicable will be based on the charge band allocated to your sites by the Distribution Network Operator.

To avoid a large invoice following the publication of the actual costs, we will include TNUoS within your charges each month, based on one of two methodologies:

1. Percentage of Maximum Demand

less than 85% of the maximum demand.

2. Estimated kW Demand
For each Financial Year, you will be charged a fixed monthly fee, based on one twelfth of your forecasted Triad demand, for each site. Where your Earliest Supply Start Date is after the commencement of a Financial Year, or your Contract Term is less than 12 months, you will be charged a fixed monthly fee for that Financial Year, based on your forecasted Triad demand divided by the number of remaining months in that Financial Year.

Further information on the Triad mechanism is available in the Statement of the Use of System Charging Methodology.

GSP	Distribution Network Area	Distribution Company
_A	Eastern England	UK Power Networks
_B	East Midlands	Western Power Distribution
_C	London	UK Power Networks
_D	North Wales, Merseyside & Cheshire	SP Manweb
_E	West Midlands	Western Power Distribution

Glossary

Availability Charge is a charge the distribution company makes for providing an electricity supply connection to your site, up to an agreed maximum electrical load (kVA)

Balancing Services Use of System (BSUoS) is a charge that allows National Grid to recover the money it spends to balance the electricity system, which it needs to do for every second of the day. This maintains the quality and security of your electricity supply

Billing Cycle indicates the billing frequency for each site

Capacity Market (CM) is a charge for supporting both generators, who invest and agree to generate electricity and large users, who agree to generate electricity, and large users, who agree to reduce electricity consumption, to ensure there is enough capacity at times when demand is high and the network needs it the most

Climate Change Levy (CCL) is an amount equivalent to all climate change levy payable in respect of the supply calculated according to the Finance Act 2000 and all relevant secondary legislation and guidance thereto

Climate Change Levy Exemption Charge (CCLE) is a charge applied by us where you have entered into a contract to be supplied wholly or partly with Renewable Source or Good Quality CHP Source Electricity

Contracts for Difference (CfD) is a charge for the government initiative that encourages new investment in lowcarbon generation by providing investors a guaranteed income for the electricity they generate

Distribution Network Area is a geographical area within which electricity is distributed from the transmission network to the end user

Distribution Loss (Dloss) is energy lost as heat as it travels down the distribution wires. These losses increase with the distance the electricity has to travel

Distribution Use of System (DUoS) is the charge the distribution company makes for distributing power to the end user over its network

Electricity Source represents the energy sourcing mix for this contract

Elxon is a charge that covers Elxon's costs for administering the wholesale electricity balancing and settlement arrangements and the associated documentation to comply with Balancing and Settlement Code (BSC) for Great Britain

Excess Capacity Charge is a charge the distribution company makes when you exceed an agreed maximum electrical load (kVA). This is applicable from 1st April 2018

Extended Supply Charges means our prevailing extended supply charges, which may vary, and which we will provide you on request

Feed in Tariff (FIT) is a charge to cover the cost of meeting the supplier's obligations under the Feed in Tariffs (Specified Maximum Capacity and Functions) Order 2010 as amended from time to time

Fully Inclusive is the point where your final electricity consumption is measured. Also known as 'customer meter'

Grid Supply Point (GSP) is a substation point where the transmission network connects to the local distribution network

Group Average Price (GAP) indicates where the total value of a contract for a group of sites has been averaged across those sites so that each site within the group has the same price

Hydro (also known as AAHEDC) is a charge to cover the tariff levied by National Grid from time to time in accordance with its Transmission Licence as part of the scheme for providing assistance with the high costs of distributing electricity in certain areas

LEC Backed % indicates the percentage of the supply normally chargeable for CCL that is eligible for exemption where you have entered into a contract to be supplied wholly or partly with Renewable Source or Good Quality CHP Source Electricity

Line Loss Factor Class (LLFC) is used to calculate the Distribution Use of System (DUoS) charges and Line Loss Factor (LLF) for the relevant MPAN

Low Carbon Charge is a charge applied by us where you have entered into a contract to be supplied wholly or partly by Pure Nuclear

Meter Administrator is a Qualified person appointed by a supplier in accordance with supplier volume allocation rules to calculate estimated energy consumption for equivalent unmetered supplies

Metering Agent Charges means for a Supply Point, any cost we have agreed to pay, have paid or are required to pay in connection with Agents Services and charges that we may apply as a result of managing those Agent Services.

Meter Timeswitch Class (MTC) is a three-digit code representing the type of metering system serving a customer's premises (indicates how many registers the electricity meter has and what times they will operate during the day)

Network Operator is the company responsible for managing the distribution system and electricity wires which transport electricity to your meter

Notional Balancing Point (NBP) is a virtual point where wholesale electricity is traded within the UK

Payment Terms means your agreed Payment Method and Payment Period for each site

Renewables Obligation (RO) is a charge to cover the cost of meeting the suppliers' obligations under the Renewables Obligation Order 2009 as amended from time to time

Standing Charge is a fixed charge applicable to each MPAN

Supply Point means all of the Boundary Point Metering Systems (as defined by the BSC) and the Unmetered Supply Point(s) that are associated with the Site and set out on the Contract Information Pack

Tax is all taxes including the Fossil Fuel Levy, Value Added Tax and any other applicable taxes (other than Climate Change Levy). Taxes will be charged at the full rate unless you have notified us of any exemptions

Third Party Intermediary (TPI) means a third party organisation or individual that, either on its own or through arrangements with other organisations or individuals, provides information and/or advice to you about the our tariffs and/or other terms and conditions, and whose payment or other consideration for doing so is made or processed by us.

"TPI Costs" means any fees, commission or other consideration including a benefit of any kind, processed by us and paid, due to be paid or made, to the TPI in respect of this contract, that are directly passed on to you.

Third Party Intermediary Commission Schedule is a separate document provided by a TPI - if applicable - and forms part of this Contract Information Pack and details any TPI Costs

Top Line of Supply Number contains additional information about your metering. The first two digits represent your Profile Class, the middle three digits represent your Meter Timeswitch Class and the last three digits represent your Line Loss Factor Class

Total Forecasted Consumption means the total sum of the Supply Point Total Forecasted Consumptions for the relevant Supply Points

Transmission Loss (Tloss) is energy lost as heat as it travels down the transmission wires. These losses increase with the distance the electricity has to travel

Transmission Network Use of System (TNUoS) is the charge the transmission company makes for transmitting power to the end user over its network

Triad Charging Method indicates which Triad charging method is applicable for attributing TNUoS charges to each MPAN

Voltage can either be Low Voltage Network, Low Voltage Substation, High Voltage Network, High Voltage Substation, Extra High Voltage

Glossary

Volume Tolerance Threshold / Period means, periodically, the amount that you may deviate from your agreed consumption without being liable to pay tolerance charges expressed as a percentage / period figure

Reactive Power Charge is a charge the distribution company makes for power which has not been efficiently converted (wasted power within the system) when operating certain types of equipment within the system

Working Day means any day other than a Saturday or a Sunday and which is not Christmas Day, Good Friday or a statutory Bank Holiday in England and Wales
